

Roasted Goat Muesli

Designed specially for goats of all ages

Available in:

Roasted Goat Muesli is a highly digestible feed designed to be fed to all goat breeds and ages.

Suitable for:

Mi Feed Roasted Goat Muesli is micronised for improved palatability, improved digestion, protected protein and makes the feed very safe.

What is Micronisation?

Micronisation is a process which cooks the starch in the grains thus making it more digestible for the animal. This process is called gelatinisation. The micronisation process includes firstly soaking (steaming) the grain and then passing it through high temperature infra-red burners and then finally rolling the grain.

This process which is similar but more efficient than steam flaking allows grain to remain partially intact but with a reduced density and increased intestinal digestion.
